

Establishing a Groundwater Sustainability Agency? All you need is RGS!

California’s Sustainable Groundwater Management Act has resulted in the recent formation of numerous Groundwater Sustainability Agencies (GSAs). These agencies are tasked with time-critical sustainability plan development and funding objectives. To accomplish these essential objectives, new GSAs are currently either competing for staff in the labor market or being staffed by already-busy JPA member agency personnel. Regional Government Services offers a full range of administrative services to get your GSA up and running using a cost-effective contract model.

What We Offer

RGS can partner with your GSA to provide all the staff work needed to administer your GSA, and deliver services through a combination of on and offsite work and support. These services may include:

- **Chief Executive**
Provides governance and public meeting support, manages planning and achievement of GSA strategic goals, oversees delivery of special projects and general administrative activity as needed
- **Clerk of the Board**
Maintains proper meeting noticing and records, oversees Public Records Act request process.
- **Risk Manager**
Evaluates and advises on insurance, contracting and legal review processes.
- **Finance and Accounting Team**
Comprehensive accounting service team PLUS funding and fiscal sustainability strategies, budgeting and financial planning support.

In addition to the core services described above, RGS is also able to offer additional resources and support in the areas of financial analysis, public policy analysis and development, community education and engagement, strategic planning, organizational communications and marketing, talent acquisition, contract management, and more.

Key GSA Partner Benefits:

- **Easy and fast acquisition of a service-ready team with focused roles and skills, who work in parallel to accomplish your GSA’s administration and project objectives.**
- **Access to our experienced talent pool. We can provide staff for special projects, and easily adjust to fluctuating workload demands.**
- **Ethical, reliable and expert administration allows partner GSA Board to focus on timely delivery of a Groundwater Sustainability Plan.**
